Hampstead Norreys Parish Council

Parliamentary Constituency Boundary Review Response

Hampstead Norreys Parish Council wishes to ensure that the villages sitting within the Pang Valley fall within the same constituency.

Hampstead Norreys sits within the Pang Valley. The Pang River rises at West Ilsley and travels through East Ilsley and Compton before reaching Hampstead Norreys. The river continues on through Frilsham, Bucklebury, Stanford Dingley, Bradfield and Tidmarsh with Sulham before reaching Pangbourne.

Every few years, Hampstead Norreys and Compton are both impacted by groundwater flooding. Water rising in the chalk aquifers below ground. The Pang Valley Flood Forum works with all the villages listed above to deliver a flood management plan that is consistent and effective along the length of the Pang.

It is essential that villages in the Pang Valley receive a consistent approach from an MP that seeks to understand and assist with flooding issues when these occur.

Hampstead Norreys Parish Council therefore requests that the Pang Valley sits within one constituency, and, in particular, wishes to ensure that Hampstead Norreys and Compton fall within the same constituency.
